

# Experiment In Progress

<b>Name</b>	
<b>Date</b>	
<b>Supervisor/Lab</b>	
<b>Telephone</b>	

Please let the next user know that you are running a sample unattended. Provide contact information and instructions for saving data (if necessary).

In Vnmr (classic view), type these commands to automatically save the FID when the experiments finishes or is stopped (note the forward and back single quotes):

```
wexp(`svf('mysamplename')`)  
werr(`svf('mysamplename-error')`)
```

In VnmrJ, please check the length of the study queue and ensure that your experiments finish on time. Your data is automatically saved when using the study queue.
