

Chemistry Archive Catalogue

ACKNOWLEDGMENTS

The pieces in this archive have been collected from many sources, including materials saved by Departmental Faculty and Staff, some of whom have been key in contributing to getting this catalogue organized and made public. I will not identify any of these colleagues by name for fear of omissions, but they know who they are and that I am extremely grateful for all they have done.

In addition, there have been alumni and others who have contributed material, and I trust that there will be others in the future. In these cases, I will express our appreciation of their generosity by naming each individually in this document, in alphabetical order.
