Date of Revision: July 13, 2017

CURRICULUM VITAE

A. BIOGRAPHICAL INFORMATION

1. PERSONAL

Name:	Dvira Segal
University Address:	Department of Chemistry, University of Toronto, 80 St. George Street, Toronto, Ontario, M5S 3H6
Office Phone:	416 946 0559
Email address:	dsegal@chem.utoronto.ca

2. DEGREES

2004	Ph.D. (direct program) in Chemistry, Tel Aviv University
Title of Graduate thesis:	Electron transfer in molecular conductors
Supervisor:	Professor Abraham Nitzan
1998	B.Sc. in Chemistry Major-Computer Science Minor, CUM LAUDE, Tel Aviv University

3. EMPLOYMENT

July 2017-	Professor, Department of Chemistry, University of Toronto
July 2012-2017	Associate Professor, Department of Chemistry, University of Toronto
July 2007-2012	Assistant Professor, Department of Chemistry, University of Toronto
2006-2007	Postdoctoral Fellow Department of Chemistry, Columbia University, New York
2003-2005	Concurrent Postdoc position in: Chemical Physics Department, Weizmann Institute of Science, Rehovot, Israel Department of Chemistry University of British Columbia, Vancouver, Canada

4. HONOURS

2014-2019	Canada Research Chair (Tier II) in Theoretical Chemistry
2010-2012	Alfred P. Sloan Research Fellow
2010-2015	Early Research Award
2000-2003	The Clore scholarship for Ph.D. students
1995, 1996	The Dean's list for academic achievements in the Faculty of Exact Sciences, Tel-Aviv University

5. PROFESSIONAL AFFILIATIONS AND ACTIVITIES

Chemical Institute of Canada: Member

B. ACADEMIC HISTORY

6A. RESEARCH ENDEAVOURS

Field: Theoretical Chemical Physics

(a) **Quantum transport and dissipation.** Our research is focused on the development of analytical and computational methods for describing charge and energy transport processes in condensed phases. This includes: (i) Formulation of methodologies for following the dynamics of many-body quantum systems driven out-of-equilibrium by a potential bias or/and a temperature gradient. (ii) Analysis of simple model systems for elucidating basic transport mechanisms, including single-molecule conduction, molecular thermoelectrics.

(b) **Energy transfer at the nanoscale.** We aim to understand the relationship between a microscopic description of a system and its energy transport characteristics—in the quantum regime—going beyond particular realizations. This includes the study of phononic, excitonic, and photonic energy flow in low dimensional systems. We are interested in elucidating nonlinear energy transport effects such as thermal rectification and in modeling molecular heat engines. This work connects with the fields of "quantum thermodynamics" and "nanophononics".

(c) **Quantum statistical mechanics.** We are interested in validating the heat exchange fluctuation theorem, quantifying violations of the second law, in strongly-coupled many-body quantum systems. By acquiring the cumulant generating function of nontrivial models we calculate the corresponding (quantum) heat current and its moments.

(d) **Finite time thermodynamics.** We are exploring fundamental issues in classical and quantum thermodynamics such as the universality of the maximum-power efficiency, Landauer's erasure principle, and information theory exorcism of Maxwell's demon.

C. SCHOLARLY AND PROFESSIONAL WORK

Names of students trained by D. Segal are underlined.

7. REFEREED PUBLICATIONS

A. Articles

1. M. Galperin, D. Segal, and A. Nitzan, Perturbation theory approach to tunneling: Direct and resonance transmission in super-exchange models, J. Chem. Phys. **111**, 1569-1579 (1999).

10. PAPERS PRESENTED at MEETINGS and SYMPOSIA (Invited) (2008-onward)

Over the past 8 years I had received invitations to present my work (invited speaker) in ~ 5 focused conferences, per year. I had accepted invitations and presented my work in the following meetings:

- National University of Singapore, Singapore, "Transmission of Information and Energy in Nonlinear and Complex Systems (TIENCS)" (May 2008).
- Helsinki University of Technology, Finland, Conference on "Micro and Nanocryogenics" (Aug. 2008).
- The 92nd Canadian Chemistry Conference and Exhibition, Hamilton, Ontario, Canada "Quantum Chemical Dynamics Symposium" (June 2009).
- Telluride, Colorado, Workshop on "Quantum Transport in Nanoscale Molecular System" (July 2009).
- UCSD, La Jolla, California, A meeting on "Optimization at a small scale" (July 2009).
- Stuttgart, Germany, International symposium "Quantum Thermodynamics: Energy and Information Flow at the Nano-Scale" (Sep. 2010).
- Erice, Sicily, Italy, "New trends in nonlinear dynamics: Heat control and thermo-electric efficiency" HEAT2010 (Oct. 2010).
- Snogeholm, Sweden, "Thermodynamics: Can macro learn from nano?" (May 2011).
- Telluride, Colorado, Workshop on "Chemistry and Dynamics in Complex Environments" (June 2011).
- Telluride, Colorado, Workshop on "Quantum Transport in Nanoscale Molecular Systems" (Aug. 2011).
- Hebrew University, Israel Institute for Advanced Studies, Jerusalem, Workshop on Molecular Electronics (July 2012).
- Telluride, Colorado, Workshop on "Quantum Transport in Nanoscale Molecular Systems" (July 2013).
- University of Toronto, CQIQC-Fields Institute CQIQC-V Conference on Quantum Information and Quantum Control (Aug. 2013).
- Bremen, Germany, CECAM workshop on nanophononics (Aug. 2013).
- Tel Aviv University, CECAM workshop on "Quantum Dynamics in Molecular and Nano-Materials: Mechanisms and Functionality" (Nov. 2013). Energy Transfer Problems"
- Telluride, Colorado, Workshop on Condensed Phase Dynamics (June 2014).
- University of British Columbia, Conference on "Coherence and Control in the Quantum World: the Legacy of Moshe Shapiro" (Aug. 2014).
- Weizmann Institute of Science, Conference on "Coherence and Control in the Quantum World: Current and Future Trends" (Dec. 2014).
- Telluride, Colorado, Workshop on "Quantum effects in condensed-phase systems" (July 2015).
- University of Hong Kong, CECAM workshop: "Open Quantum Systems: Computational Methods" (Nov. 30 to Dec. 4 2015).
- San Sebastian, Spain, "Towards Reality in Modelling of Molecular Electronics" (June 2016).
- Telluride , Colorado, Workshop on "Condensed Phase Dynamics", (June 2016).
- Paris, France, CECAM meeting on "Seeking synergy between dynamics and statistics for non-equilibrium quantum processes", (June 2017).

11A. INVITED LECTURES

- University of Toronto, Condensed Matter Physics Seminar Series (November 2009).
- Tel Aviv University, Israel, Chemical Physics Seminar Program (December 2009).
- University of Pennsylvania, Physical Chemistry Seminar (November 2011).
- Department of Chemistry, University of Toronto, John Valleau Special Lecture, (November 2011).
- Department of Physics and Astronomy, Uppsala, Sweden, Seminar (May 2012).
- School of Chemistry, Tel Aviv University, Physical Chemistry Seminar (Dec. 2012).
- Department of Chemistry, Weizmann Institute of Science, Physical Chemistry Seminar (Dec. 2013).
- Department of Chemistry, UCSD, Physical Chemistry Seminar (Feb. 2014).
- Department of Chemistry, University of Pittsburgh (April 2015).
- Department of Chemistry, Tulane University, New Orleans (September 2015).
- Department of Physics, Bar-Ilan University, Israel (December 2015).
- Colloquium, Department of Physics and Astronomy, McMaster University (Nov. 2016).

- Colloquium, Department of Physics, Technical University Berlin (Dec. 2016).

11B. INVITED TALKS (2017-)

- ICTS Program on Open Quantum Systems, Bangalore, India, July 2017.
- Workshop on Quantum Thermodynamics, ITAMP Harvard University, Cambridge MA, Oct. 2017.
- Symposium on Chemical Physics at the University of Waterloo, Nov. 2017.
- Condensed Phase Dynamics workshop, Telluride Science Research Center, July 2018.

D. LIST OF COURSES

12. A. UNDERGRADUATE COURSES

CHM 223S, Physical Chemistry: The Molecular Viewpoint	2017
CHM 135S, Chemistry: Physical Principles	2017
CHM 326F, Introductory Quantum Mechanics	2012
CHM 221S/225S/223S, Physical Chemistry: The Molecular Viewpoint	2012,2013,2015,2016
PHY 479Y, Undergraduate Research Project	2011-2012
CHM 499Y, Introduction to Research in Chemistry	2009-2010
CHM 423F, Applied Quantum Mechanics	2008-2010
CHM 139S, Chemistry: Physical Principles	2008-2010, 2012, 2015,2016
CHM 499Y, Introduction to Research in Chemistry	2008-2009
CHM 299Y, Research Opportunity	2008-2009

B. GRADUATE COURSES

CHM 1443F, Intermediate Quantum Mechanics: Focus on open systems	2014, 2016
CHM 1490Y, Physical Chemistry Seminar, 25 students	2012-2013
CHM 1478, Quantum Mechanics for Physical Chemists; 26h, 6-10 students	2009, 2011

C. THESIS SUPERVISION: Ph.D. STUDENTS

Roya Moghaddasi Fereidani	Mechanisms of energy transport in molecules	2016-
Hava Friedman	Path integral simulations of charge and energy transfer	2015-
Michael Kilgour	Molecular conduction: From principles to functionality	2014-
Salil Bedkihal	Quantum transport in double-dot Aharonov-Bohm interferometers	2010-2014
Yelena Simine (nee Nicolin)	Theory of charge transport through vibrating molecules	2009-2014
Claire Xue Yu	Energy transfer at the molecular scale: open quantum systems methodologies	2008-2013

RESEARCH SUPERVISION: POSTDOCTORAL FELLOWS/SCIENTISTS

Bijay K. Agarwalla	Thermoelectricity of nanojunctions	2015-2017
Edward Taylor	Quantum bounds for quantum transport	2014-2015
Manas Kulkarni	Equilibration in closed quantum systems	2012
Savannah S. Garmon	Exceptional points in open quantum systems	2009-2012
Malay Bandyopadhyay	DNA bubble dynamics and energy transfer in nanoscale junctions.	2009-2012
Yun Zhou	Heat engines and information theory	2008-2010
Lianao Wu	Quantum energy transfer at the nanoscale: fundamentals and applications	2008-2009

UNDERGRADUATE RESEARCH SUPERVISION

Anqi Mu	Quantum thermodynamics	CQIQC Summer Fellow 2017
Roman Korol	Molecular thermopower	CQIQC Summer Fellow 2017 Excellence Research Award 2016
Hyehwang Kim	Tunneling-hopping conduction in DNA	Chemistry Research Scholarship 2016
Nazim Boudjada	Spin dynamics and heat transport	CQIQC Summer Fellow 2014
Amro Dodin	Landau Zener transitions in open systems	NSERC USRA 2013
Wei Jia Chen	Thermoelectricity of molecular junctions	NSERC USRA 2013
Kunal Tiwari	Equilibration in interacting quantum systems	PHY 479Y 2011-2012
Pengcheng Dong	Heat capacity of nonlinear chains	CHM 499Y 2009-2010
Yelena Nicolin	Dimers diffusion on temperature gradients	CHM 499Y 2008-2009
Guillermo Toro Silvero	The damped-anharmonic oscillator	CHM 299Y 2008-2009

D. OTHER TEACHING and OUTREACH ACTIVITIES

Second annual "Ask a Laureate event"; Poster, Judge	2011, 2013
Science Rendezvous, Pueblo Science	2012-2014

E. ADMINISTRATIVE POSITIONS

13. A. UNIVERSITY SERVICE

Department of Chemistry:	Information Technology and Cyber security committee, chair. (2015-) Progress Through the Ranks Research Committee (2015) Undergraduate Studies Committee (2010-2013) Colloquium Committee (2007-2010) Graduate Student Committee (2007-2010) Scinet (Computing) Local Resource Allocation Committee (2009-2010)
Outside the Chemistry Department:	Dean's Working Group on Cyber Risk Mitigation (2015-) Scinet Local Resource Allocation Committee (2010-2011)
PhD Committees:	Ongoing: 9 students from the Departments of Chemistry and Physics. Completed (2008-2016) 20 students.

13. B. OUTSIDE THE UNIVERSITY SERVICE

Journal Referee ($\sim$ 30 in 2016)	APS, ACS, RSC, AIP, Elsevier and IOP Journals, AAAS including: Phys. Rev., JCP, JPC, JACS, Science, PNAS, Nano Lett., PCCP, Chemical Science, EPL, ACS Nano, Small, JAP, J. of Stat. Mech, NJP.
Ontario Graduate Scholarships:	Member of adjudication panel (2012)
Conference Organization:	-100th Canadian Chemistry Conference and Exhibition (2017), Co-chair, PT division program Co-organizer, Symposium on "Quantum Dynamics in Chemistry" -Theoretical Chemical Physics Symposium, Theoretical Chemical Physics Symposium in the 93rd Canadian Chemistry Conference and Exhibition (2010)
External Thesis Examiner	Physics, National University Singapore (2015) Physics, Raman Research Institute Bangalore (2009)
Grant and Fellowship Review	NSF, DOE-BES, RCSA, BSF, NSERC Discovery Grant, GIF, NWO GIF, NWO, DFG, ISF
